**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

Applicant's communication filed on 04/06/2005 has been carefully considered by the examiner. The arguments advanced therein are persuasive with respect to the rejections of record, and those rejections are accordingly withdrawn. In view of a further search, however, a new rejection is set forth below. This action is not made final.

#### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 6-7 drawn to the apparatus and method claims 9-10, 15-16, 18-19 and 24-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Young (US 5,821,694).

With respect to claim 1, Young discloses an accelerator waveguide (10) comprising an end cavity (22), the accelerator waveguide to output first particles from the end cavity at a first energy in a first mode and to output second particles from the end cavity at a second energy in a second mode (col. 1, lines 5-20), and a detuning device (col. 4, lines 36-45, or lines 62-67 or col. 5, lines 12-22 inherently discloses a detuning device) coupled to the end cavity (22).

With respect to claim 6, Whitman discloses an RF power source (col. 3, lines 40-55) to transmit a first wave having a first power to the accelerator waveguide in the first mode, and to transmit a second wave having a second power to the accelerator waveguide in the second mode.

Art Unit: 2821

With respect to claim 7, Whitman discloses a particle source (col. 3, lines 40-45, or Figs. 1-2) to inject particles at a first current into the accelerator waveguide in the first mode, and to inject particles at a second current into the accelerator waveguide in the second mode.

With respect to claims 9-10, 15-16, 18-19 and 24-25, the apparatus discussed above would perform the same method.

***Allowable Subject Matter***

3. Claims 2-5, 8, 11-14, 17, 20-23, 26 would be allowable if rewritten to include all of the limitations of the base claim and any intervening claims and /or written to overcome the objections set forth in the office action.

4. The following is a statement of reasons for the indication of allowable subject matter:

The cited art of record fails to teach the detuning device comprising a probe movable between a first position in the first mode and a second position in the second mode as defined in claims 2, 11, 20, or an electrical circuit including an electrical conductor, a portion of the electrical conductor disposed within the end cavity as defined in claim 3, 12 and 21.

***Inquiry***

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Trinh Vo Dinh whose telephone number is (571) 272-1821. The examiner can normally be reached on Monday to Friday from 9:30AM to 6:00PM.
